- The Turnkey SITC solution includes water planning analysis, control DSS software, tailored IoT measurements, renewable power, communication devices, and related services

Automated Cloud Service for Water Management

- Hybrid SITC & annuity model optimizes water utilities by detecting leaks, reducing waste, and ensuring fair distribution through effective data-driven water management.
- Cloud based water utility asset management software providing access to data, reports and analytics on real time basis

Process Automation for Data Validation Information routing

- Offers real time data acquisition, analysis, data quality check(V&V) and reporting services for weather & Hydrology related needs.
- Tailored reports, predictive insights, and real-time trends of water usage. Continuous critical alerts and alarms delivered to stakeholders through automated 24/7 process

Flood Early Warning Solutions (FEWS)

- An inhouse developed ready to deploy package for barrages, dams, reservoirs, hydro power plants assessing the risk of flooding and support system to predict and provide longer lead time along with emergency alarm based on the severity of flood and the trends

Irrigation Canal SCADA Gate Control

- A system of software and hardware components enabling the measured release of water based on requirement and demand

Market Problems & Canarys Solutions

Problems faced in existing water resource management

- Existing systems have no provisions available to accurately measure the volume of water in open flow irrigation channels
- Absence of real time communication and collaboration systems
- Lack of digitalization- high dependency on human inputs throughout
- Lack of modernization in the current system
- Inability to predict floods resulting in life and asset destruction
- 30-60 year old canal systems requiring redevelopment and modernization through digital transformation

How are we solving the problems faced in the existing process?

1. Real time decision support system in a canal network or sub-basin
2. Common communication platform for real time data distribution on available volume of water
3. Comprehensive turnkey model providing complete solutions for monitoring and managing water resources
4. Cloud based water management software help to optimize water utility and planning
